

How to make the poppies

1. Cut out each flower shape and decorate in whatever way you wish.
2. Place one set of petals on top of the other and push a little hole through the middle of both sets, using the tip of a pencil.
3. Thread a pipe cleaner through the hole and twist a knot at one end of the pipe cleaner to create the centre of your poppy flower.
4. Bend over the back of the pipe cleaner to make a stem and hold the flower in place.
